Assumptions

UPDATE

Devs will reference comps in Zeplin to see width of each module to determine if grid width or full width. Reference grid layer on Zeplin.

All carousels on mobile are “swipable.”

All items defined as having variable height on desktop are variable height on mobile.

GLOBAL NAVIGATION - MOBILE

GLOBAL HEADER - MOBILE

NOTES:

01. Promotional Banner

This element includes one constant message or a carousel element containing up to three messages with arrows on both sides that allow user to tap through.

- Entire area of banner is active and links to corresponding page. When this element is a carousel, the messages rotate every 3 seconds. Business to determine how many and which promotions display here.

- Text is HTML

- Messages must not exceed 55 characters.

02. Brand Tabs

Tabs allow user to toggle between TCP and Gymboree websites. On tap, Gymboree Logo will highlight the logo in white in the same placement to the right of TCP.

03. Menu Icon

Tapping the menu icon opens the mobile navigation which slides in left to right (shown on page 7).

04. TCP Logo

Links to TCP Homepage.

05. Gymboree Logo

Links to Gymboree Homepage. Logo placement remains the same as user toggles between TCP and Gymboree.

06. Search

Tapping anywhere within the search bar opens a full screen search overlay shown on page __.

07. Account Icon

TBD in upcoming Account & Loyalty Sprint.

08. Store Locator

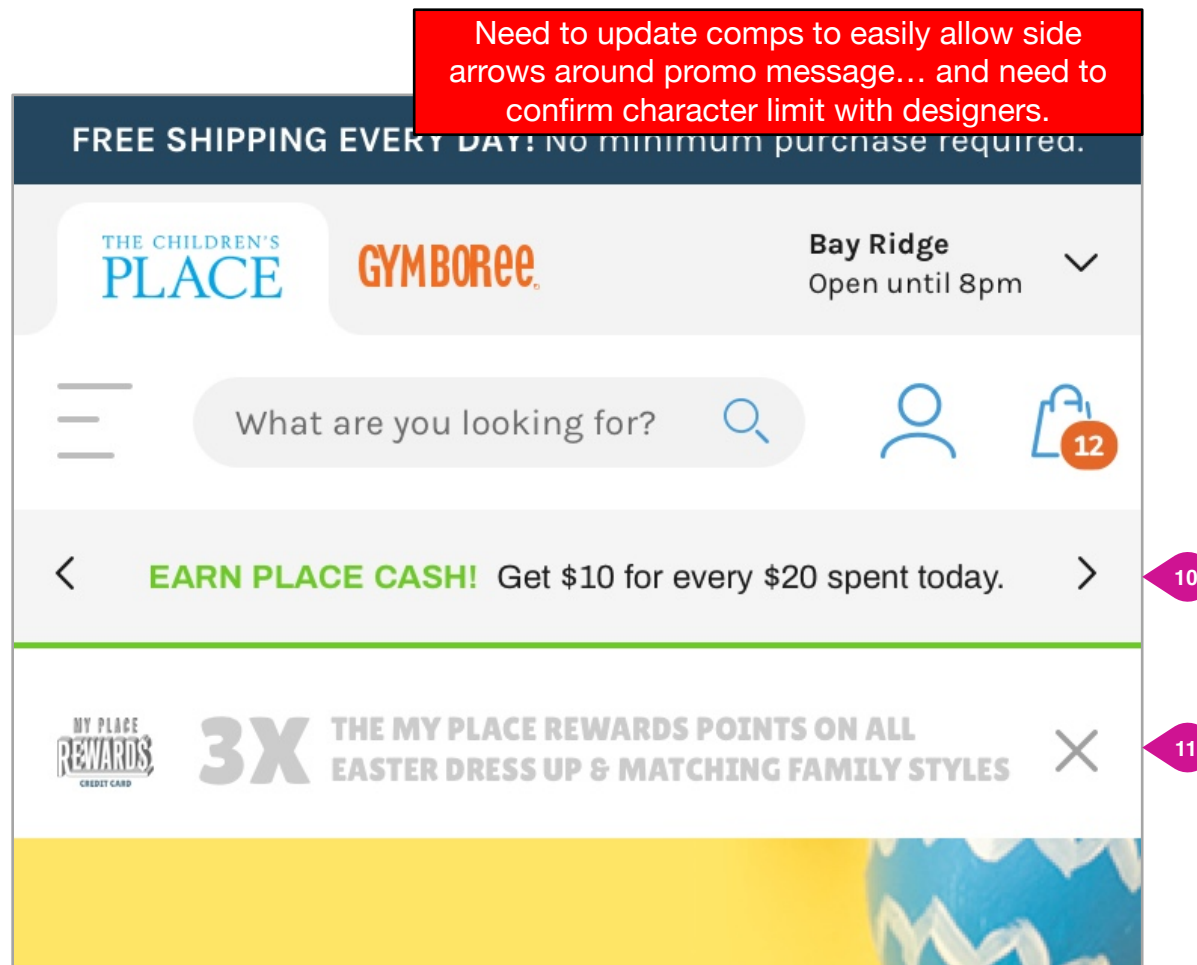

Opens a full screen store locator page shown on page __.

09. Bag Icon

Element is comprised of HTML text and an image. It will always display to the right of account icon.

- On tap, links to bag.

- Number displaying on bag changes as user adds and removes products from bag.

GLOBAL HEADER - MOBILE

NOTES:

10. Promotional Banner Carousel

Carousel element containing up to 3 promotional messages. The messages rotate every 3 seconds. Side arrows allow user to click through carousel in either direction. Entire area of each banner is active and links to corresponding page. Business to determine how many and which promotions display here.

- Should not exceed 55 characters in length.

11. Loyalty Promotional Banner

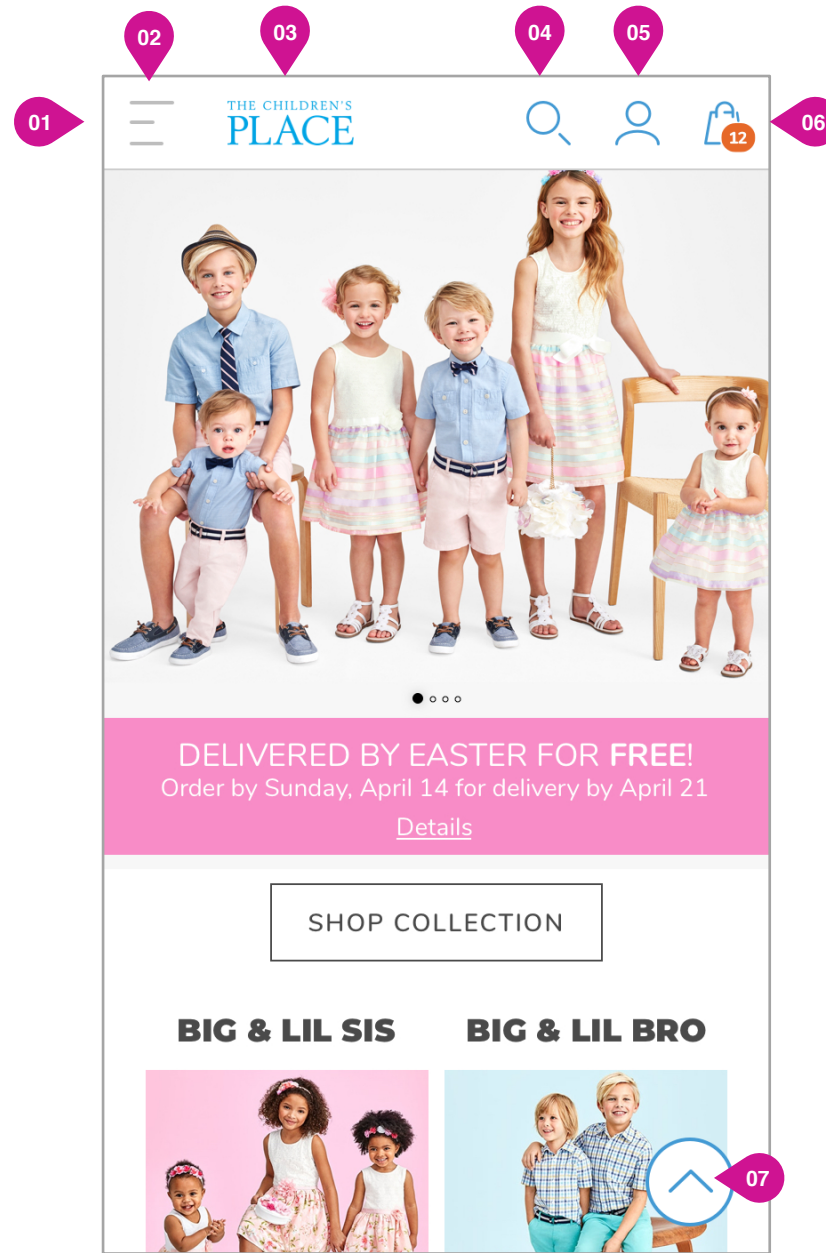

This area is dynamic and displays personalized content based on user's authenticated/loyalty status (e.g. Guest vs. MPR vs. PLCC).

- Guest users see Loyalty promo

- Loyalty users see Credit Card promo

- Credit Card users see relevant promo to be determined by the business.

- Tapping the X icon closes promotional banner.

MINIFIED HEADER - MOBILE

NOTES:

01. Minified Mobile Header

As the user scrolls down the page, a minified version of the header anchors to the top of the browser and remains persistent.

02. Menu Icon

Tapping the menu icon, opens the mobile navigation which slides in left to right (shown on page ___).

03. TCP Logo

Links to TCP Homepage.

04. Search

Tapping anywhere within the search bar opens a full screen search overlay shown on page ___.

05. Account Icon

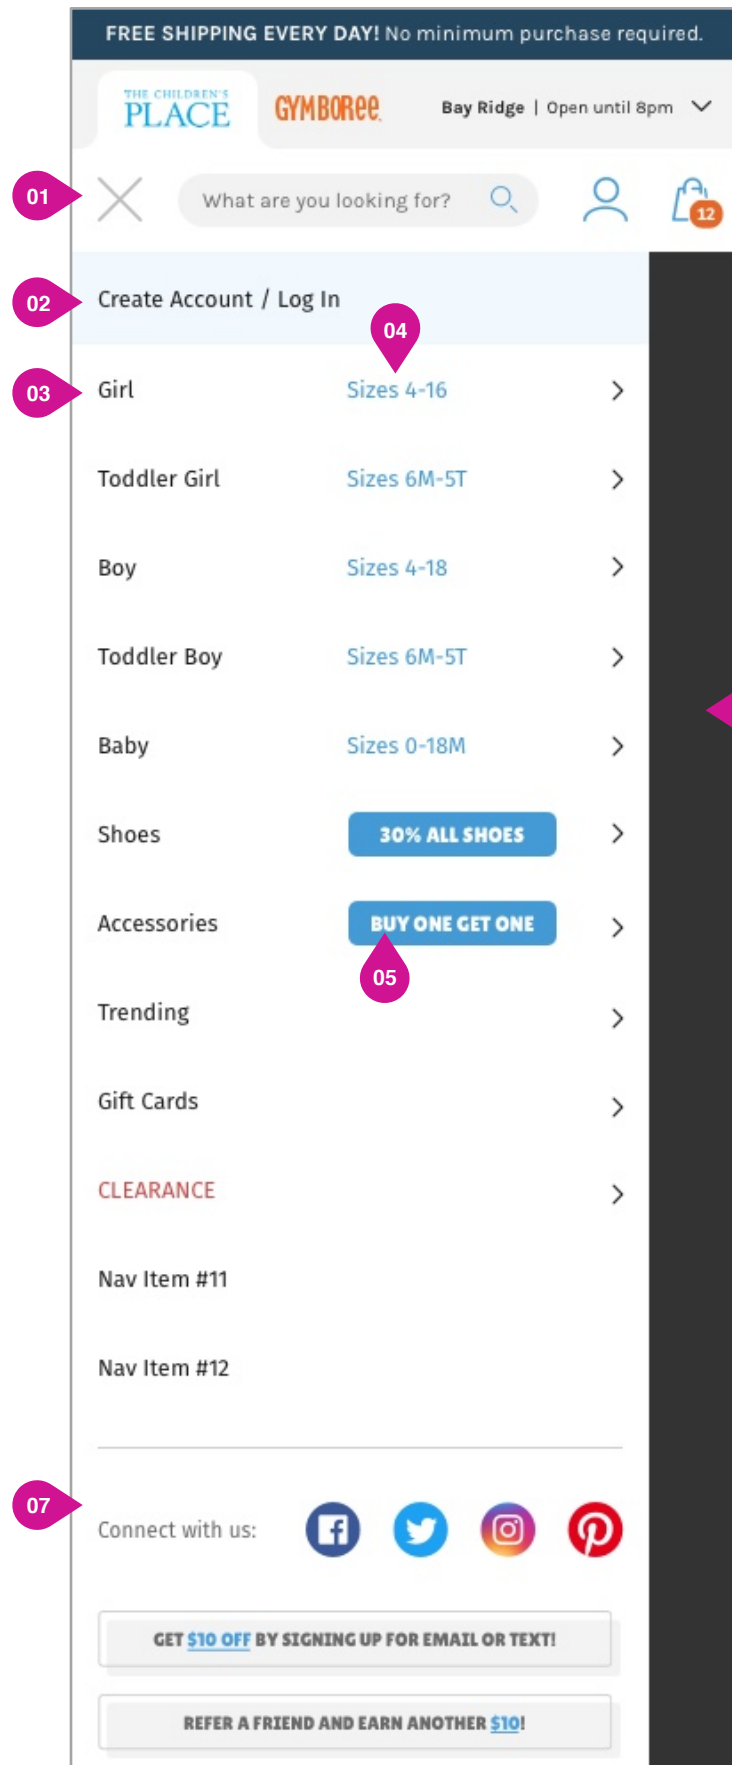

Links to the Account section.

06. Cart Icon

TBD Links to cart.

07. Back to Top Button

Scrolls user back to the top of the page.

MOBILE L1 NAVIGATION: Guest

NOTES:

01. X Icon

Closes menu drawer and returns user to current page.

02. Account Creation/Log In Link

TBD in upcoming Account & Loyalty Sprint.

03. Primary Navigation Element

On tap, slides open the secondary navigation. Entire bar is an active area.

04. Category Size Range

Text labels for size ranges display for 5 main categories (shown here). Clickable as part of access to the next level of navigation.

05. Promotional Banner

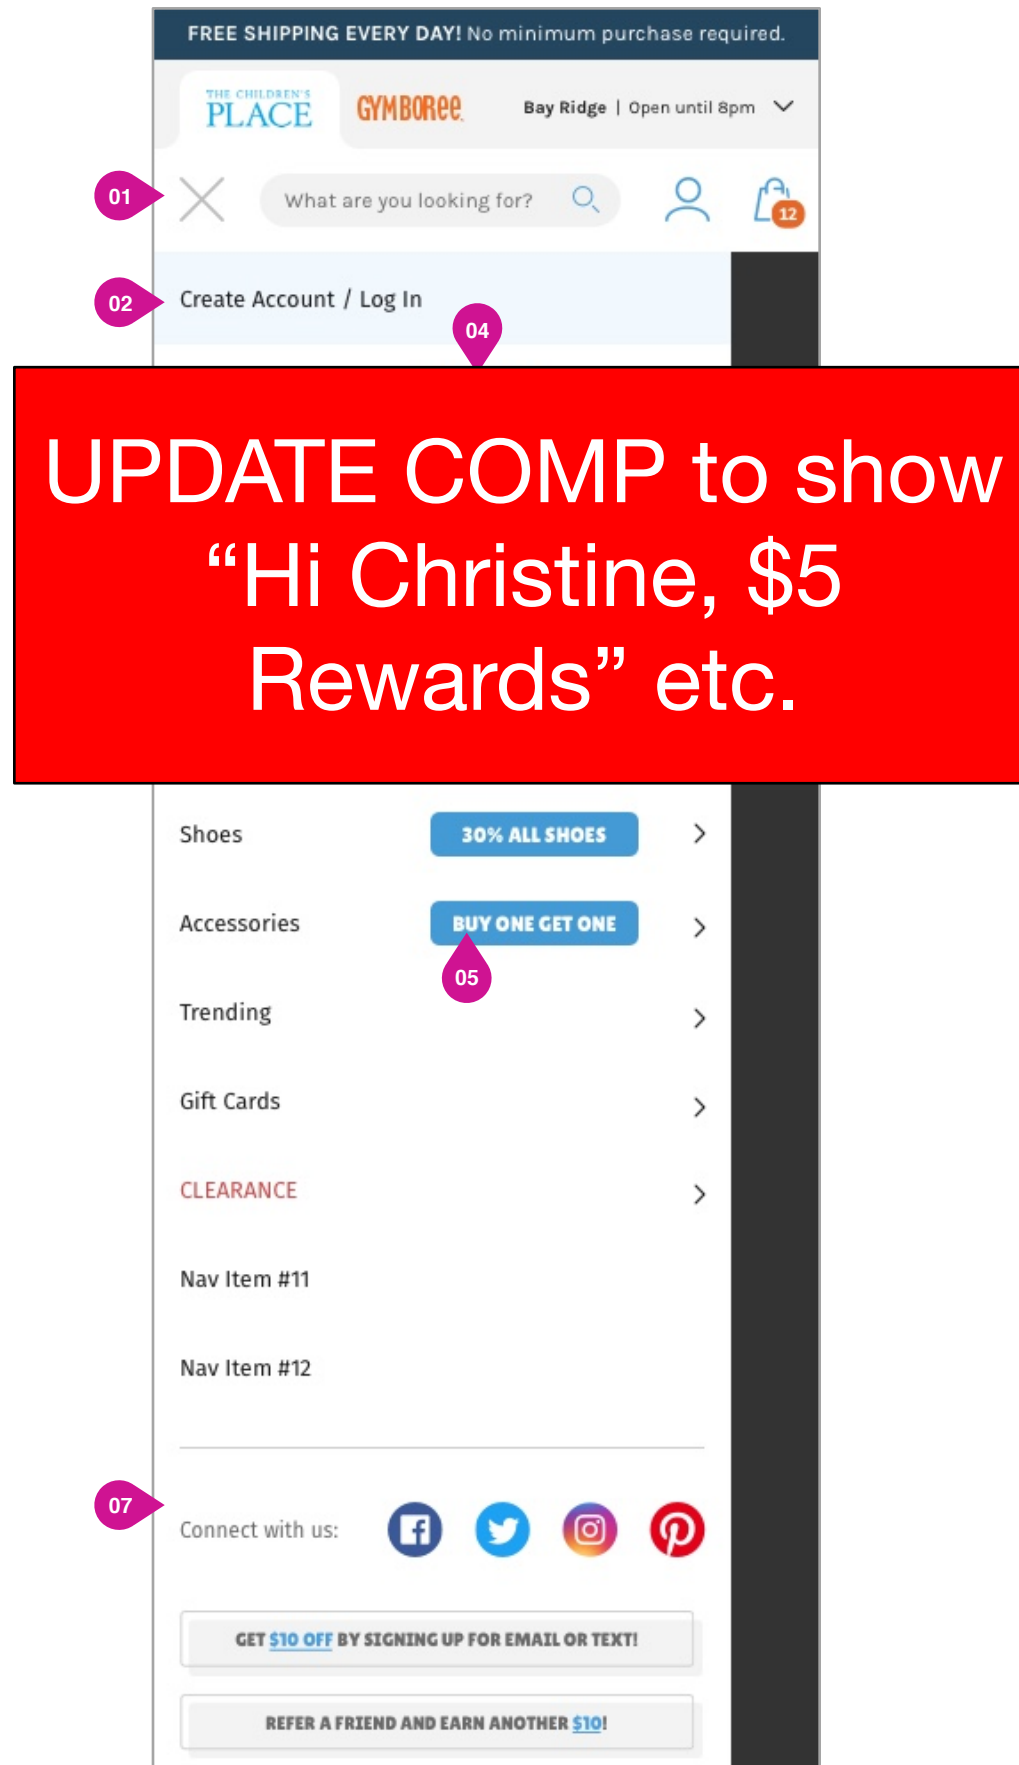

HTML Text, clickable as part of access to the next level of navigation. Business to determine what promotions display here. These promotional banners can be used for any navigation other than the 5 main categories (see item 04 above).

06. Dark Overlay

Upon expansion of the menu, a dark overlay appears over content below disabling it. When the menu retracts, the overlay disappears and content on the page is visible and active again. Tapping on the overlay closes the menu.

07. Footer

The footer is included as part of the mobile navigation. Functionality is defined on page _____.

MOBILE L1 NAVIGATION: Authenticated

NOTES:

01. Close

Can include one constant message or a carousel of messages with arrows on both sides that allow user to tap through carousel. Tapping text links to designated page.

02. Account Creation/Log In Link

Opens the appropriate page

03. Primary Navigation Element

Clicking slides open the secondary navigation

04. Category Size Range

Where appropriate, text displaying the size range displays. Clickable as part of access to the next level of navigation

05. Promotional Banner

HTML Text, clickable as part of access to the next level of navigation

<WHAT ARE THE RULES FOR DISPLAYING THIS VS THE SIZE RANGE?>

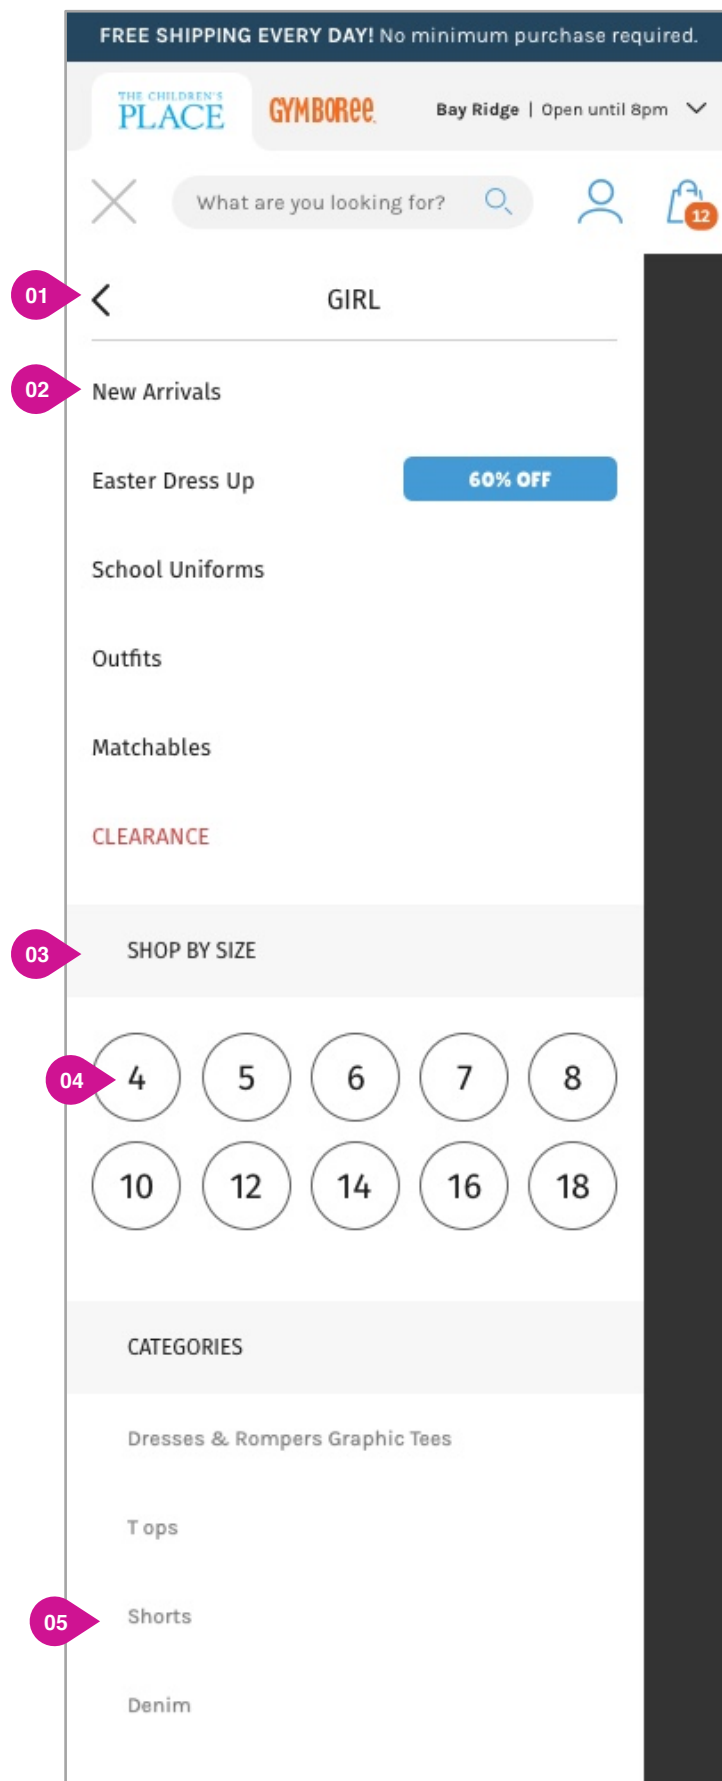

06. Dark Overlay

Upon expansion of the menu, a dark overlay appears over content below disabling it. When the menu retracts, the overlay disappears and content on the page becomes clickable again.

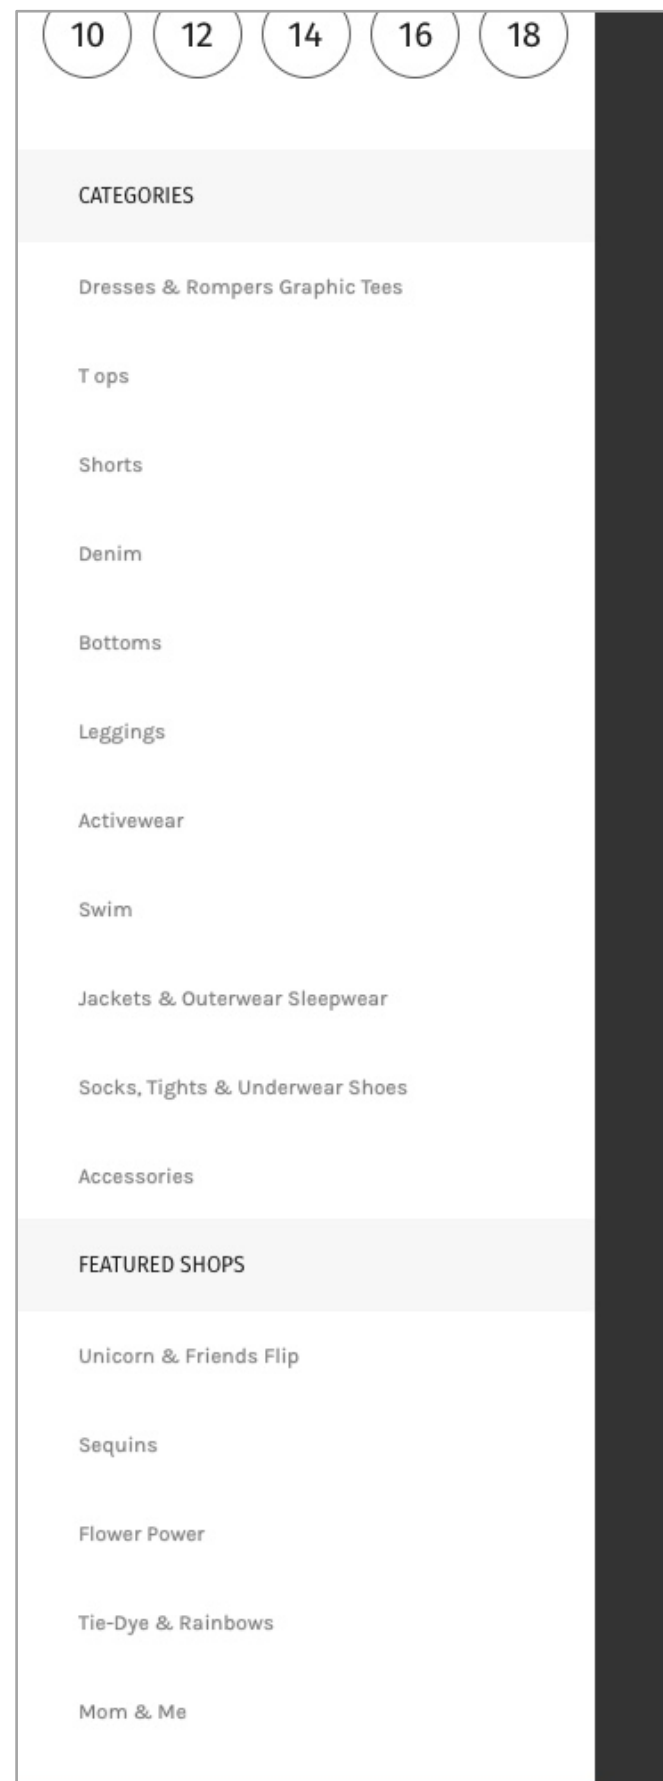

07. Footer

The footer is included as part of the mobile navigation. Functionality is defined on page _____.
