Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind texts. Separated they live in Bookmarksgrove right at the coast of the Semantics, a large language ocean.

A small river named Duden flows by their place and supplies it with the necessary regelialia. It is a paradisematic country, in which roasted parts of sentences fly into your mouth.

Multi-panel mechanism

1. Once a third level panel opens, allowing for browsing facets in that subcategory, a parent panel gets minimized to preserve real estate. This process is repeated for every level so only top level panel (Business Area) and lowest level panel (in this case Data Protection) is fully expanded.

2. User can, at any time, close any of the panels.

3. If user clicks on the checkbox the main content area gets replaced with the with Selected Filters section and with the Results section. Selected filters will provide information scent and display a list of selected facets (in this case Hardware & Equipment Management) while the Results section will display a list of Council Members corresponding to selected facets.
